Experience

Adappt / Owner

Jan 2018 - Present

Full stack web developer. "Full stack" means I do everything from what the user sees, to server-side programming, to database setup and maintenance.

I work with small business owners to create or re-create their business' website or mobile app(s).

Navitaire / Software Developer

December 2016 - October 2017

Full stack web developer for airlines. Created beautiful and functional front end UI with **MDL** and **Angular 2** and maintained backend services & API including the use of **Node** and **C#**.

Oracle / Technical Analyst, Japanese Speaking

April 2016 - Nov. 2016

Used SQL to maintain databases and data-centers that service hotels and restaurants in North America and Asia.

Education

Utah Valley University / Bachelor's Degree of Computer Science

August 2015 - Present

I graduated with my associates degree at age 17. I am currently studying computer science, emphasizing in networking. This means my speciality is with web and mobiles applications.
